

How to Remove Proudly Powered by WordPress Footer Link?

The illustration shows four people in a collaborative environment. Two individuals are standing and pointing at a whiteboard that displays a pie chart and a bar chart. Two other people are seated on the floor, working on laptops. The scene is set against a light orange background.

How to Remove Proudly Powered by WordPress Footer Link

Looking to [remove proudly powered by WordPress footer links](#) on your website.

If you are using a default WordPress theme like Twenty Twenty Two, Twenty Twenty, or any default theme, then most probably you have seen the “Proudly powered by WordPress” Text link in Footer.

What is Proudly Powered by WordPress?

“Proudly Powered by WordPress” is a simple text placed on the WordPress theme footer. It is mostly present on the default WordPress themes. This footer text will act as a small credit that is placed for WordPress.

Then what happens?

You probably want to hide or remove the proudly powered by WordPress footer links to make your website look more professional.

There could be many reasons you need to delete or remove proudly powered by WordPress link.

Sometimes you don't want that link or change the copyright footer to add your business copyright information on the footer.

Having a credit with another name could potentially damage the website quality and reduce users' trust. The website should be unique and have strong brand connections to make it better.

How to Remove Proudly Powered by WordPress in Website Footer?

Simply follow the below steps to delete, change or remove WordPress copyright in the footer. We have also provided different methods to remove copyright information.

Many free WordPress doesn't provide you the option to edit the copyright footer text and link.

But if you are using a Multifox theme, you can change or remove the copyright footer quickly. It's because the [Multifox theme](#) comes with a header and footer builder to customize it fully.

Step 1: Visit the WordPress dashboard, then navigate to the Footer option and click Add footer.

Dashboard > Footer > Add Footer

Step 2: Name a New footer, and publish it.

Step 3: Then click the **Edit with Elementor** button (ensure you have installed the Elementor plugin) It takes you to the Elementor dashboard.

Step 4: Then drag the text editor to include a text and fill up the needed copyright information. Also, change the text and background color of the footer. After customizing it, click update from the bottom left corner. (Now the new footer is created)

Step 5: Now, visit the WordPress customizer.

Dashboard > Appearance > Customize

Step 6: On the customizer, select **Site General** and click **Footer**.

Step 7: In the site footer option, change the **standard footer** to a **custom footer**.

Step 8: Then, on the footer template, select the newly created footer template name. Now the new footer copyright will appear on the footer.

These are the simple methods to change copyright footer text in WordPress sites using page builders.

How to Remove Proudly Powered by WordPress Plugin

Another effective method to remove proudly powered by WordPress is with the plugin. There is a dedicated “remove Powered by WordPress” [plugin](#) to make it easier. (Here is how to [install a WordPress plugin](#))

Once installed and activated the plugin then navigates to the WordPress customizer.

Dashboard > Appearance > Customize

On the WordPress customizer, click **Theme Options**.
